SUMMARY

Being a licensed Technician/Electrician under the National Construction Authority of Kenya (site supervisor) and also the Energy and Petroleum Regulatory Authority of Kenya, I have vast experience in regards to Electrical works in Domestic, Commercial and Industrial specialization.

I have 2years practice experience at the KENYA PORT AUTHORITY, Mombasa, under PORT ELECTRICAL DEPARTMENT, I gained adequate knowledge and skills required to perform Electrical works efficiently and professionally.

The department team and I, successfully installed lighting fittings, switches and other appliances at various warehouses within the port and the Clients were satisfied and appreciated our work.

I collaborated with other technicians from the department to revive a faulty generator, carry out preventive maintenance, routine checks in control rooms and electrical equipment, and my performance was ranked satisfactory.

Having being placed as security supervisor during FIFA WORLD CUP, I boast of the rare experience gained working as a team leader. My performance was ranked best and I was awarded a trophy for the work well done.
