## Profile

I am a mechanical engineer with experience in the repair and maintenance of vehicles. Currently, I am working at an Auto repair shop in Calgary. I have the ability to change engine oil, replace and balance tires, replace brake pads and discs, and replace suspension springs and front-end components. I have a lot of experience in replacing or fixing the auto parts. Throughout my education, I have gained scientific knowledge of mechanical engineering and hold a bachelor's degree in Mechanical Engineering.

My educational background and work experience are from my home country, where I have 2 years of mechanical work experience.

I am very eager to progress in this career and obtain my professional mechanic and Red seal license and I'm studying and trying to get it.

## Experience
