

MECHANICAL TECHNICIAN

SHERIF ADEWALE KAREEM

EXPERIENCE

My progressive work experience in engineering field specifically as a mechanical technician totals ten years of continuous learning and providing solutions to problems encountered. In that decade of experience, I have explored so many working environments and companies both home and abroad solving problems and growing extensively in my line of duty and by GROWTH, I mean I became a result-driven mechanic specialising in customer service, adept at identifying engine malfunctions and effective communications to customers and my line manager TO PROPOSE a COST-EFFECTIVE solution within an achievable time frame.

SKILLS

Proficiency in Ms Word, Ms Excel
and Ms PowerPoint
Excellent Communication
Team Management
Leadership

GENERATOR MECHANIC

Nigeria Bag Manufacturing PLC, Nigeria

(March 2013 – March 2018)

- Optimize the performance of machinery and equipments
- Handled the servicing and maintenance of Caterpillar, Jenbacher and Wartsila generators
- Monitor and ensure continuous flow of plant operations.
- Adhered to daily and weekly checks for smooth operations of the equipments
- Making sure all engines onshore and offshore are fully operational
- Adequate communication of problems solved and complete diagnosis report on any engine worked on to my line manager.
- Team work oriented and making sure all HSE rules and guidelines are completely adhered to.

GENERATOR MECHANICAL TECHNICIAN SUPERVISOR

Uraga Power Solutions Limited (UPSL), Nigeria

(April 2018 – Nov 2021)

- Optimize the performance of machinery and equipments
- Monitor and ensure continuous flow of plant operations
- Handled the maintenance and servicing of Caterpillar, MTU, Jenbacher generator sets.
- Provide weekly and daily reports of the operations across the power plants.
- Adequate communication of diagnosis report to my line manager
- Adhering to all HSE guidelines on any task being carried out
- Perform weekly HSE training to the staffs available and ensuring all other staffs participate when they are on duty.
- Overhauling of gas and diesel generators
- Report any near miss or accidents that occurred to my line manager on a weekly basis if any and also recommend solutions to avoid/mitigate future incident
- Interpretation of electrical

GENERATOR TECHNICIAN

RA International, Somalia

(Nov 2021 till date)

- Monitor and ensure continuous flow of plant operations within and outside the UN Base Camp
- Handled the maintenance of servicing of Volvo, Coelmo, FOGO and John Deere diesel generators
- Optimize the performance of machinery and equipments
- Servicing and repairs of generators at FOBs across the country
- Provide adequate report of tasks carried out to my line manager
- Attend weekly HSE training

WORK RELATED KEY ACHIEVEMENTS

- Rectification of engine over speeding
- Rectification of engine load imbalance
- Part of the overhauling team both home and abroad
- Installation of engines onsite and offsite
- Decommissioning of sites

TRAINING

- **Technical Training (Electromechanical), FMN Technical Training School, 2011 – 2013**
- CAT repairs, service and maintenance training, 2018
- Auditing training, 2020
- Diesel engine synchronization training, 2021

AWARDS/CERTIFICATES

- FMN technical training certificate
- Trade test 1
- Trade test 2
- Trade test 3
- Senior secondary school certificate (S.S.C.E)
- Yaba college of technology
