About

A dedicated, responsible, and highly driven individual with over 10 years of experience in infrastructure and construction site management. Known for being a team leader and multi-tasker, I strive to ensure adherence to health and safety regulations while creating a cooperative and positive work environment for all. Experienced in both technical and managerial positions, with a background in general engineering and electronics & telecommunications. Currently seeking a position that combines both my knowledge and practical experience.

Education

- General Engineering (2012 – 2014)
Lebanese International University, Beirut (LIU)
- Official Technical Baccalaureate (2011)
General Directorate for Vocational and Technical Education, Lebanon
- Technical Baccalaureate in Electronics and Telecommunications (2007 – 2008)
Byblos High Technical Institute, Lebanon

Work Experience

Construction Site Supervisor (June 2017 – December 2023)

Al-Princess Construction and Quarry – Doha, Qatar

- Ensuring compliance with health and safety rules and regulations
- Managing employee schedules and equipment distribution and operation
- Cost analysis and researching market value of machinery, equipment, and materials
- Coordinating engineers and sub-contractors' work on the ground for quality and timely implementation
- Monitoring and evaluating progress through weekly consolidated reports and regular meetings
- Mediating and resolving conflict that arises throughout the work between stakeholders/staff/suppliers
- Training and assisting newly appointed staff as well as providing constructive feedback and evaluation
- Collaborating with project managers and engineers to set plans and budgets

Site Supervisor – Excavation & Transportation (September 2014 – January 2017)

Al-Princess Construction and Quarry – Doha, Qatar

- Monitored schedules, compliance, and site official documentation and logistics
- Safeguarded storage units and conducted regular quality assurance of heavy machinery and other equipment
- Tracked inventory and updated orders for materials accordingly on a daily basis
- Ensured compliance with site and personal safety regulations
- Submitted weekly progress reports and input on projects' progress as well as needs/gaps
- Oversaw excavation work and coordinated the transportation of heavy equipment

Successful Projects:
