

JOB DESCRIPTION | Buggy Pilot

[Quidich Innovation Labs](#) pioneers products and customized technology solutions for the Sports Broadcast & Film industry. With a mission to bring machines and machine learning to sports, we use camera technology to develop services using remote controlled systems like drones and buggies that add value to any broadcast or production. Quidich provides services to some of the biggest sports and broadcast clients in India and across the globe. A few recent projects include Indian Premier League, ICC World Cup for Men and Women, Kaun Banega Crorepati, Bigg Boss, Gully Boy and Sanju.

What's Unique About Quidich?

- Your work will be consumed by millions of people within months of your joining and will impact consumption patterns of how live sport is viewed across the globe.
- You work with passionate, talented, and diverse people who inspire and support you to achieve your goals.
- You work in a culture of trust, care, and compassion.
- You have the autonomy to shape your role, and drive your own learning and growth.

Role

A Buggy Pilot at Quidich is deployed on some of the most exciting sports projects across the world. The Pilot is at the forefront of where the action takes place on ground. Apart from providing innovative ways in which the BuggyQam can enhance the broadcast, the pilot is expected to translate the company strategy for this service into actionable goals, being fully accountable for its implementation. The Pilot, along with the Cinematographer are responsible for successful delivery of projects, ensuring client satisfaction and retention. Moreover, being the boots on ground, Quidich depends on all its operators to suggest and/or develop hardware, software and operational improvements to enhance efficiency in all operations. Finally, as the Pilot develops their skills, they will get the opportunity to groom younger/ newer talent on the team.

Responsibilities

- Piloting the Buggy on projects in a way that adheres to the company's policies on safety and privacy, while ensuring delivery of quality exceeding clients expectations.
- Liaisoning with the Camera team and Director to devise shots and framing, ensuring that the BuggyQam is optimally utilized to provide the best output.
- Training new Buggy Pilots to a standardized level of competence.

- Managing equipment, including scheduling and/or undertaking routine maintenance, in your custody to ensure it remains fully functional and in prime operating conditions at all times.
- Creating and maintaining a Standard Operating Procedure for operation and maintenance of the Buggy Qam in different use-cases.
- Ensuring that there is no material loss to the company resulting from missing/misplaced.
- Requisitioning any supplementary or replacement items as required for the operation of the BuggyQam from the operations team and maintaining a cost ledger for the same.
- Following all processes related to the operations team or otherwise, on a timely basis and suggesting improvements where required.
- Upholding the values and culture of the company while on projects and otherwise.

Required Skills

- Good communication skills
- Experience in driving RC cars
- In depth knowledge of computers
- Ability to multitask

Preferred Skills and Experience

- Knowledge of cameras
- Understanding of PID tuning
- Advanced knowledge of RC Cars and ancillary equipment maintenance
- Basic Knowledge of Embedded electronics/Robotics

Reporting To: Manager - Operations

Joining Date: Immediate (Mumbai)
