PROFILE

An experienced electrical practitioner in Main Distribution Board (MDB) and Sub-Main Distribution Boards (SMDB) installations. Possesses knowledge in LV and HV installation wiring and cabling, testing, and maintenance. Understands various electrical components and safety standards while proving power distribution effectively and reliably.

WORK EXPERIENCE

Buildx Builders General Contracting LLC 2017 - 2024
Electrical Supervisor (Abu Dhabi, United Arab Emirates)

- Evaluate and select appropriate insulation materials based on electrical load, environmental conditions, and compliance with industry standards.
- Supervise the proper installation of insulation to ensure effective coverage and protection of electrical components and wiring.
- Conduct routine inspections of insulation integrity to identify any wear, damage, or deterioration that could lead to safety hazards.
- Implement insulation resistance testing to assess the effectiveness of insulation over time and maintain safety standards.
- Ensure all insulation practices adhere to relevant electrical codes and safety regulations to protect personnel and equipment.
- Maintain accurate records of insulation materials used, testing results, and maintenance performed for compliance and reference.
- Educate team members about the importance of insulation in electrical systems and best practices for handling and maintaining insulation materials.

EDUCATION

Diploma, Automobiles 2013-14
Chittagong polytechnic institute
GPA: 3.06 / 4.0
