Objective

I have a bachelor's degree in Electrical Engineering, passionate about the maintenance of industrial appliances and electrical and mechanical equipment. Strong installation, maintenance and repair skills. I'm always committed to giving the best of myself.

Experience

- Tunisian Company for Gypsum Adhesives | TATAOUINE_TUNISIA** February 2022 - Present
Electrical Technician
 - Perform preventive and corrective maintenance of industrial equipment (mechanical, electrical, pneumatic).
 - Diagnose and repair faults quickly to ensure production continuity .
 - Read and interpret drawings, electrical diagrams and technical diagrams.
 - Collaborate with team members to optimize equipment performance.
 - Application and compliance with the safety rules necessary for the protection of people and property.
 - Use the necessary measurement and control equipment for diagnostics.
- Company brick belmabrouk | KEBILI_TUNISIA** August 2021 - January 2022
Industrial electrician
 - Install civil and industrial electrical systems Perform routine maintenance on electrical systems, devices and systems .
 - Identify and repair breakdowns and malfunctions, test installed and repaired electrical systems.
 - Installation and connection of motor control panel cables.
 - Carrying out troubleshooting on all forms of cable-related services.
 - Assembly of low voltage switch boards.
- Company Conuersol | TUNISIA** September 2020 - July 2021
Solar Installation Technician
 - Carry out studies for the installation of solar panels.
 - Carry out the installation of a photovoltaic project connected to the grid or isolated site.
 - Ensure the connection and proper functioning of the solar panels.
 - Fixing the metal supports of the structure and the panels and Wiring and fixing DC and AC cabinet .
 - Make the necessary diagnosis to detect electrical failures.
- Freelance work | TATAOUINE_TUNISIA** Novembre 2019 - August 2020
Electrician building
 - Installation , Wiring , Maintenance and repair of electrical systems
 - Reading and understanding of circuit diagrams and technical drawings
 - Installation of cable trays, trunking, sleeves and installation of equipment or instruments.
 - Prepare daily and weekly reports on electrical work progress and ensure all documentation is upto-date.
- Company IDEAL BRICK** September 2018 - October 2019
Electrical Technician

Internship

- End of Study Project**
Ideal Brick | MONASTIR March to Juin 2018
- Technician internship**
MEDGYP | TATAOUINE January 2017
- Introductory course**
Tunisian Electricity and Gas Company | TATAOUINE January 2014

Education

- **Higher Institute of Technological Studies in Mahdia** 2014 - 2018
Applied degree in electrical engineering
- **Secondary studies of GHOMRASSEN** 2008 - 2013
Diploma of Secondary Education

Skills

- Microsoft Office (Word, PowerPoint et XL)
- AutoCAD
- TIA Portal
- GAMO
- Design and wiring of electrical cabinets
- Building and industrial electrical installations.
- Ability to interpret blueprints and diagrams.
- Strong problem-solving skills and attention to detail.
- Diagnose and repair failures
- Knowledge of electrical systems and safety protocols.
- Teamwork
- Communications
- Control panels
- Safety procedure

Languages

- Arabe : mother tongue
- English : intermediate
- French: intermediate
