Experience

- Sontrach - complexe gl1k - algeria** 2021 - 2024
Superior technician in Industrial maintenance - electromechanical
 - Preventive Maintenance:** Regularly scheduled inspections and servicing to prevent equipment failures. This includes lubricating moving parts, checking fluid levels, and replacing worn components.
 - Corrective Maintenance:** Repairs and replacements done when equipment breaks down. This can involve diagnosing issues, ordering parts, and fixing the problem promptly.
 - Predictive Maintenance:** Using data and analytics to predict when equipment is likely to fail. This helps in planning maintenance before issues occur, reducing downtime.
 - Condition Monitoring:** Continuously monitoring the condition of equipment using sensors and other technologies. This can involve checking temperature, vibration, and other parameters to identify potential problems early.
 - Cleaning and Lubrication:** Ensuring that machinery and equipment are clean and well-lubricated to operate smoothly. This helps in reducing wear and tear.
 - Calibration:** Ensuring that instruments and equipment are calibrated correctly for accurate measurements and optimal performance.
 - Safety Inspections:** Regular checks to ensure that all safety equipment and systems are functioning correctly. This includes fire extinguishers, emergency shut-off systems, and personal protective equipment.
 - Documentation:** Keeping detailed records of maintenance activities, including what was done, when it was done, and any parts that were replaced. This helps in tracking equipment performance and planning future maintenance.
 - Training and Development:** Ongoing training for maintenance personnel to keep them updated on the latest technologies, techniques, and safety protocols.
 - Spare Parts Management:** Keeping an inventory of critical spare parts to ensure quick repairs and minimize downtime
