ANIS BELKADI

Sales Engineer

Results-driven Sales Engineer with expertise in building materials and fit-out solutions. Skilled at identifying customer needs, providing tailored product recommendations, and delivering exceptional service. Passionate about driving sales growth and building long-term client relationships while ensuring the successful execution of projects

professional experiences

Sales Engineer

Since 2023 [Al Asema Building & Materials Trading](#) Qatar,Doha

- Managed the full sales process for building materials and fit-out solutions, including tiles, porcelain, marble, granite, cement, and gypsum powder.
- Produced detailed 2D and 3D AutoCAD drawings for both fit-out and construction projects, including material layouts, space planning, and installation details.
- Coordinated procurement processes, ensuring timely delivery of materials, and managed client relationships to ensure customer satisfaction and repeat business
- Supported the project team by providing technical drawings, installation guidelines, and project-specific documentation to ensure smooth project execution.

Sales engineer

From 2022 to 2023 [Al Qussour Al Othamaniya](#) Doha,Qatar

- Led the sales and technical coordination of building materials and fit-out solutions, specializing in tiles, porcelain, marble, granite, and gypsum powder.
- Developed 2D and 3D AutoCAD drawings for design proposals, including floor plans, material layouts, and installation instructions, to clearly communicate project scope and vision to clients and contractors.
- Assisted in the preparation of tenders and project proposals, incorporating detailed design drawings, material specifications, and accurate cost estimates.

Administrative Assistant

From 2019 to 2022 [Ghezaltar Design & Deco](#) Algeria Algeria

- Provided technical guidance on material selection, installation methods, and design feasibility, ensuring alignment with client expectations and budget constraints.
- Worked with contractors, architects, and design teams to ensure that AutoCAD drawings were accurate, comprehensive, and in compliance with building codes and regulations.
- Conducted site surveys and assessments, creating drawings to document existing conditions and plan material usage efficiently.
