MANUAL TESTING ENGINEER

- Developed and executed comprehensive test plans, test cases, and test scripts aligned with project requirements.
- Conducted functional, regression, integration, and user acceptance testing for web and mobile applications.
- Identified, documented, and tracked defects using Bugzilla, collaborating closely with the development team for issue resolution.
- I collaborated with developers to ensure the timely resolution of bugs and quality improvements.

ANGULAR WEB DEVELOPER

- As a web developer i have designed and developed dynamic, responsive, and user-friendly web applications using Angular.
- I have implemented the user interface (UI) components and interactions in alignment with the project specifications.
- I collaborated with backend developers to integrate APIs and ensure seamless communication between frontend and backend.
