WORK EXPERIENCE

Solar Panel Installer

2 year

. Electro Teach, Faisalabad Pakistan.

- Installed mounting brackets for solar panel installations on rooftops and other locations.
- Installed panels' solar shingles and solar modules.
- Wired newly installed equipment into the power grid.
- Completed testing and troubleshooting of newly installed solar energy systems to ensure they worked appropriately.
- Utilized plumbing skills to connect home and business water systems into the solar energy system.
- Completed maintenance and repair of existing installations when needed.
- Replaced non-working panels' shingles and modules.
- Communicated with clients during installation process to facilitate installation completion.
- Was timely to appointments and completed contracts within given time limits.
- Was willing to work long hours evenings and weekends when individual projects so required.

Electrician

2 year

. Manzor Electric store, Jaranwala.

- Installed, repaired, maintained, and tested commercial, industrial, and residential electrical systems complying with company safety, operations, and productivity initiatives.
- Positioned wire and electrical cable systems, conduit systems, and wire raceway systems.
- Built control panels from drawings and troubleshoot equipment electrical systems and control circuits.
- Prepared sketches and schematic diagrams showing the location of wiring and electrical systems.
- Managed workflow schedule to meet the company's established goals and objectives.
- Effectively communicate with peers, customers, and vendors demonstrating the highest level of professionalism and courtesy.

Helper

2 year

. Main Electric Store, Jaranwala.

- Assisted in wiring and fixture installation and repair.
- Conducted regular inspections of wiring fixtures and equipment as required.
- Complied with relevant safety and operations codes for all tasks.
- Installed and repaired a wide variety of building electric systems.
- Checked electrical units for broken insulation and loose connections.
- Used hand tools to reassemble equipment and replace worn or defective parts as needed.
- Transported electrical materials supplies and tools to various work sites as assigned.
