Education

Diploma In Computer Software Engineering

May 1998 - Sep 2002

Mid kent College, Ashford

- Developed proficiency in programming languages such as Java, C++.
- Gained hands-on experience with software development methodologies including Agile and Waterfall, facilitating effective project management.
- Learned to design and implement databases using SQL, which can aid in managing data related to performance.
- Cultivated skills in user interface design and user experience principles, ensuring that driving simulators are both functional and user-friendly.
- Acquired knowledge in networking and system architecture, important for integrating driving simulators with external systems and databases.
- Acquired knowledge in software testing and quality assurance, crucial for ensuring the reliability.

12 years of education (Intermediate)

Jan 1986 - May 1998

Pakistan Education Academy, Dubai

Employment

LTV Driving Instructor

Sep 2002 - May 2007

Belhasa Driving Center, Dubai

- Provided comprehensive training to drivers in LTV operation and safety protocols for various driving conditions in Dubai
- Implemented assessment techniques to evaluate driver performance and ensure adherence to local traffic regulations.
- Conducted workshops to improve driving skills and knowledge of LTV controls and maintenance procedures.
- Developed instructional materials and resources to support the training curriculum for LTV driving instructors and students.
- Monitored and analyzed students' progress, providing feedback and tailored lesson plans to meet individual learning needs.
- Evaluated and revised training programs based on student outcomes and feedback to ensure continuous improvement in instructional quality.

LTV Driving Instructor

Jul 2008 - May 2014

Emirates Driving Company, Abu Dhabi

- Delivered specialized training programs focusing on LTV driving techniques and simulation strategies in Abu Dhabi.
- Utilized advanced simulator technology to create realistic driving scenarios for instructional purposes.
- Assisted in the development of standardized training modules for LTV instructors to enhance consistency in teaching.
- Provided comprehensive training to drivers in LTV operation and safety protocols for various driving conditions in Dubai
- Implemented assessment techniques to evaluate driver performance and ensure adherence to local traffic regulations
- Monitored and analyzed students' progress, providing feedback and tailored lesson plans to meet individual learning needs
