WORK EXPERIENCE

DESIGNER

Tunisia

Urban planning and architectural decoration workshop
Oct 2017 - Feb 2019

- Use computer-aided drafting (CAD) software programs and equipment or a conventional drafting station to create and modify architectural documents, designs, working drawings, forms, charts and records
- Analyze current building codes, by-laws and requirements to establish how they affect architectural drawings, and stay up-to-date on all required and relevant codes
- Bring together structural, mechanical and electrical designs and create a way or a method of accurately arranging them to produce building designs that are understandable and feasible
- Draw detailed and rough scale plans for structures, foundations and buildings based upon preliminary concepts, sketches, specification sheets, engineering calculations and other provided data
- Design interior room arrangements for commercial buildings using computer-assisted drafting (CAD) equipment and software
- Acquire and assemble information needed to finish architectural drawings, visiting job sites when necessary to gather measurements
- Oversee, organize and inspect the work of draftspersons, technologists, technicians and other relevant team members working on construction projects
