

PRECIOUS ISIOMA OMUOJINE

Doha, Qatar | +97452041522 | isijyne@yahoo.com

Summary

Meticulous and performance-focused Metering Engineer with proven experience in energy metering systems, quality assurance, and advanced meter monitoring technologies. Demonstrated success in leading district meter roll-out projects (e.g., CAPMI), performing energy audits, and contributing to the lowest ATC & C losses in company history. Adept in the installation, configuration, and troubleshooting of HV and LV metering panels, as well as mentoring junior engineers in metering technology and data analysis. Skilled in using metering software tools to monitor performance, maintain statistical records, and ensure compliance with regulatory standards. Strong background in cross-functional collaboration, technical documentation, and client-supplier coordination.

Skills

- Energy Meter Installation & Configuration
- Advanced Meter Monitoring (AMI/MD Meters)
- HV/LV Metering Panels Maintenance
- Energy Auditing & ATC & C Loss Reduction
- Meter Troubleshooting & Diagnostics
- Quality Assurance & Certification Compliance
- Project Engineering & Meter Roll-out (e.g., CAPMI)
- Technical Mentoring & Team Support
- Order Processing & Fulfillment
- Supplier & Client Relationship Management
- Statistical Record Keeping & Data Analysis
- Workflow Optimization & Process Improvement
- Network Device Configuration
- First-Level IT Troubleshooting
- System Documentation & Reporting
- Hardware & Software Installation Support

Experience

(Metering Engineer) **01/2016 - 05/2025**

Eko Electricity Distribution Company

- Spearheaded the certification and quality assurance of over 10,000 energy meters, ensuring full regulatory compliance and enhanced meter accuracy.
- Led engineering operations on the District Meter Roll-out Project (e.g., CAPMI), expanding metering infrastructure across multiple districts.
- Conducted comprehensive energy audits on MD meters, directly contributing to the company's achievement of its **lowest** ATC & C loss in 2024.
- Mentored and trained more than 10 junior engineers and technicians in advanced metering technologies and data analysis, boosting team performance.

(National Youth Service Corps) **11/2012 - 10/2013**

Benjamin & Winston Limited, Lagos Nigeria

- Processed and tracked a high volume of customer orders, ensuring timely fulfillment and maintaining order accuracy.
- Maintained and updated statistical records regularly, improving data organization and supporting business reporting needs.
- Liaised with multiple suppliers and clients to coordinate deliveries, resolve issues, and ensure smooth supply chain operations.
- Streamlined order processing workflows, reducing turnaround time and enhancing customer satisfaction.

Network and Communications Support (Internship) **03/2011 - 08/2011**

Total Upstream Nigeria Limited, Victoria Island, Lagos

- Assisted in the configuration and maintenance of network devices and communication systems, supporting over 50 end-users across departments.
- Monitored network performance and provided first-level troubleshooting, resolving daily connectivity issues and minimizing system downtime.
- Documented and updated network diagrams and support logs, improving technical documentation accuracy and team handover efficiency.
- Collaborated with IT staff to support hardware and software installations, enhancing system functionality and user productivity.

Education and Training

Bachelor of Science in Industrial Physics (Electronics and IT Application) **06/2008 - 06/2012**

Covenant University, Ogun State Nigeria

HSE-Management System Administration in Engineering Projects

2019

THE NIGERIAN SOCIETY OF ENGINEERS (IKEJA BRANCH)
