Summary

I am a professional industrial electrician with over 12 years of experience in India and 3.6 years in the GCC. I am motivated to leverage my education and extensive knowledge in electrical troubleshooting, installation, and inspection of electrical systems. My experience spans various sectors, including maintenance of commercial buildings, hotels, house wiring, home appliance repair, and industrial settings.

Professional experience

MULTI TECHNICIAN

Apr 2008 - May 2011

Keyman builders and developers India Ltd | Thrissur

Checked and resolved electrical complaints, repaired home appliances, performed generator oil changes, carried out plumbing work, and assisted with air conditioning maintenance and repairs.

MAINTENANCE TECHNICIAN

Jul 2011 - Nov 2012

Mayura inn | Mannuthy

Establish a maintenance plan: Create a maintenance schedule that includes both routine checks and comprehensive testing. This helps identify potential hazards before they become serious problems

Track maintenance procedures: Assign a senior team member to oversee and track maintenance activities to ensure that all electrical systems are functioning optimally

MAINTENANCE TECHNICIAN

Jan 2013 - Jan 2018

Elite yrfm | Thrissur (Athani)

Responsible for scheduling and coordinating weekly preventive maintenance, as well as selecting team members to carry out these tasks. Our weekly maintenance checks include: All motor terminals, All electrical panels, APFC Panel, Star-delta starters and DOL starters, Sensors (vibration sensors, electromagnetic valves), Inkjet printers, PLC-controlled packing machines, Conveyors, Milling machines, Crushing machines, Stitching machines, Winding machines. Business Sector: Operations focused on the food manufacturing sector.

Kadhi village industries | Thrissur (kuttur)

Responsible with addressing electrical complaints and troubleshooting various types of clothing manufacturing machines. Our responsibilities include: Checking sensors and solenoid valves, Taking electrical meter readings and documenting the results, Maintaining diesel generators, Performing mechanical maintenance, Changing motor bearings, Applying grease to moving parts, Changing gear oil, among other tasks

Business Sector: Operations focused on the fabric manufacturing sector. This version enhances readability and professionalism while clearly outlining your responsibilities.

MAINTENANCE TECHNICIAN

Oct 2021 – Apl 2025

Waseef | Qatar

Responsible for attending to electrical troubleshooting and checking various panels as part of our weekly preventive maintenance program. Our tasks include: Inspecting booster pump panels

Conducting weekly electrical preventive maintenance on: Distribution Boards (DB), Main Distribution Boards (MDB), Sub-Main Distribution Boards (SMDB), Low Voltage (LV) panels, Automatic Power Factor Correction (APFC) panels, HVAC panels

Business Sector: operations are focused on the facilities management (FM) sector. This version enhances clarity and professionalism while clearly outlining your responsibilities.
