🔧 Profession: Process Operator / Electrician / Electronics Technician

PROFESSIONAL PROFILE

Dedicated and technically skilled Process Operator and Electrician with a Bachelor of Science in Electronics and over 2 years of hands-on experience in factory operations, electrical systems, and machine maintenance. Safety-conscious, detail-oriented, and committed to continuous improvement. Seeking to contribute to industrial operations in your company with high standards of quality and efficiency.

KEY SKILLS

- Electrical installation & maintenance
- PLC troubleshooting & basic programming
- Factory & process operations
- Preventive & corrective maintenance
- Industrial safety & compliance
- Machine control systems
- BMS (Building Management Systems) basics
- Technical drawings & schematics
- Team collaboration & adaptability

WORK EXPERIENCE

1. KARWA (MOWASALAT) DOHA - QATAR

RANK MARSHAL 10/2024 - TO DATE

- Supervise and manage taxi ranks to ensure smooth passenger flow and vehicle dispatch.
- Coordinate with drivers, dispatchers, and control room to maintain efficient transport operations.
- Provide customer service by guiding passengers and addressing inquiries or complaints.
- Enforce company policies and ensure drivers comply with traffic and safety regulations.
- Monitor vehicle movement, maintain shift logs, and report daily operations to management.
- Support crowd and traffic control during special events.

2. SAI PHARMACEUTICALS KENYA LIMITED – NAIROBI , KENYA

ELECTRICAL ENGINEER AND PROCESS OPERATOR – 01/09/2023 – 30/08/2024

- Ensured smooth operations by routinely checking machinery for faults.
- Maintained safe working environment through rigorous adherence to health and safety protocols.
- Improved product quality by regularly monitoring and adjusting settings on equipment.
- Reduced downtime during major maintenance works by coordinating with engineers effectively.
- Carried out routine checks for identifying potential problems, ensured uninterrupted production.
- Performed regular machine cleaning tasks to prolong equipment life span.
- Operated control panels efficiently for streamlining the overall process flow.
- Kept detailed records of operational data, ensuring accuracy throughout the process.
- Facilitated effective communication between shift teams for seamless handovers.
- Loaded raw materials into machinery with precision, enabling accurate processing results.
- Adjust machine settings and process parameters for optimal performance.
- Work collaboratively with maintenance and quality control teams.
- Conduct testing and diagnostics using electrical instruments.
- Support the installation and commissioning of electrical systems in industrial

settings.

- Cable laying through trunks and conduit.
- Installation of sockets, switches and bulbs.

3. KTDA NYAMACHE TEA FACTORY – NAIROBI , KENYA

ELECTRICAL ENGINEER (INTERNSHIP) – 01/05/2023 – 30/07/2023

- Conducted comprehensive safety checks to ensure compliance with industry standards.
- Optimised power usage using advanced energy management strategies, leading to cost savings.
- Troubleshoot hardware issues efficiently, minimising downtime.
- Maintained up-to-date knowledge of industry advancements through continuous professional development.
- Reviewed wiring and circuit diagrams to determine sequences and methods of operation.
- Utilised expertise in electronic principles to optimise equipment functionality and performance.

4. RIVATEX TEXTILE COMPANY – NAIROBI , KENYA

ELECTRICAL ENGINEER (INTERNSHIP) – 03/05/2022 – 30/07/2022

- Participated in team meetings for better understanding of project requirements and guidelines.
- Developed detailed reports on equipment failures leading to improvements in maintenance strategies.
- Compiled data related to power consumption trends resulting in improved energy management strategies.
- Improved the reliability of machinery through regular maintenance tasks and system upgrades.
- Assisted senior engineers with installation procedures leading to quicker project completion times.

EDUCATION

Bachelor of Science in Electronics, 2019 - 2023

University of Eastern Africa Baraton, Eldoret Kenya.
