Experience

Del tunnexzy electrical ventures

2023 - 2025

Electrical Technician / General Supervisor

- Install, maintain, and repair electrical wiring, systems, and equipment in residential, commercial, or industrial settings by successfully wired and installed electrical systems for over 50 residential and commercial projects with zero rework.
- Perform routine inspections to identify potential hazards or malfunctions.
- Ensured 100% compliance with local electrical codes and safety regulations, contributing to a zero-incident safety record over two years.
- Worked closely with engineers and construction supervisors to deliver electrical installations on time and within budget.
- Oversee day-to-day operations and supervise staff or skilled tradespeople on construction or technical sites.
- Managed a team of 20+ technicians and laborers, increasing productivity by 25% through better task delegation and shift planning.
- Ensured that all site activities complied with OSHA and local safety standards, achieving a "no violations" status during inspections.
