About Me

A highly accomplished Civil Engineer with over 10 years of experience in project management, quality control, and structural design within the telecommunications and civil construction industries. I have a proven track record of advancing from a Quality Control Engineer to a Project Manager, successfully leading projects from initial design and inspection to final acceptance.

Experience

Quality Control Engineer Huawei Myanmar

July 2013 to July 2014 (1 year)

As a Quality Control Engineer, I successfully supervised telecom tower construction, ensuring adherence to strict quality, safety, and timeline standards. My responsibilities included conducting HSSE inspections, monitoring construction progress and material quality, and performing quantity surveying. I was also adept at managing project schedules, coordinating with subcontractors, and generating daily site progress reports to ensure transparency and accountability.

CME Auditor Engineer Ooredoo Myanmar

July 2014 to February 2020
(5 years, 8 months)

As a CME Auditor Engineer, I was responsible for visiting and inspecting sites for a wide range of activities, including tower construction, BTS installation, and commissioning. I collaborated with vendors and Tower Co. to supervise self-built site projects and ensured a smooth handover by making RFI & Commercial power acceptance. I consistently managed the inspection of TI installations, coordinated I&C activities, and controlled Tower Co. progress for new site construction, all while providing daily reports on site status.

Project Engineer ZTE Myanmar

March 2020 to December
2021 (1 year, 8 months)

As a Project Engineer, I successfully managed and ensured the acceptance of B2B sites. My responsibilities included directing civil work maintenance for Ooredoo's self-built sites to uphold operational standards and calculating and managing Tower Co EPA/FPA to maintain efficient control over construction processes.

Project Manager KTN Myanmar

January 2022 to June 2025
(3 year, 5 months)

As a Project Manager, I successfully led project management activities, ensuring timely delivery and quality control for telecom and building projects. My responsibilities included performing tower design calculations and inspections to meet structural standards, creating detailed AutoCAD drawings, and designing building structures using ETABS. I also conducted detailed assessments of buildings damaged by earthquakes.

Education

Technology University Yangon
Bachelor of Civil Engineering

2006 - 2011
