## ABOUT ME

Professional with over 17 years of experience in interior design, technical specification, and construction management, with a strong focus on efficiency, cost control, and economic feasibility. I develop construction solutions that integrate design, materials, and processes to minimize costs without compromising durability or aesthetics.

My extensive hands-on experience in construction management and material specification enables me to optimize workflows, improve predictability, and deliver financially efficient projects tailored to different scales and investment profiles.

## WORK EXPERIENCE

### Construction Manager – Lionville Participações

Jul/2024 – Oct/2025 (1 year and 3 months)

- Responsible for managing construction projects and teams, from foundation to final delivery.
- Control of schedule, quality, and costs, ensuring predictability and waste reduction.
- Purchasing and technical curation of materials, prioritizing performance and cost-effectiveness.
- Supporting management in decisions regarding project execution and compatibility.

### Self-employed professional – BCP Soluções e Gestão Criativa

Jun/2014 – ongoing (11 years and 4 months)

- Leadership of medium and high complexity architecture and interior design projects, conducting all stages, from concept to delivery.
- Management of teams, suppliers, schedules, and budget control.
- Supervision of residential and commercial construction projects.
- Solid experience in technical specification of materials and construction solutions.
- Transformation of architectural vision into concrete results, balancing technical expertise, management, and field experience.

### Creator and Instructor of the Online Course Especificando Interiores

Mar/2019 – ongoing (6 years and 7 months)

- Development of an online course for interior design professionals, with over 300 students in Brazil and worldwide.
- Creation of a comprehensive curriculum combining theory and practical examples, focused on advanced methods of material specification and cost optimization strategies.
- Emphasis on integrated project thinking, ensuring consistency between architectural, structural, and interior design elements.
- Preparation of an e-book with applied strategies for savings in carpentry.

### Junior Architect – Mauricio Ribeiro Arquitetura

Mar/2008 – Jun/2014 (6 years and 3 months)

- Participation in the execution of high-end residential projects, with attention to architectural details, materials, and technical solutions.
- Monitoring of the project cycle, ensuring professional service and support for customer satisfaction.
- Preparation of drawings in AutoCAD, ensuring accuracy, fidelity to the project, and technical standardization.
