

NOMAN MANZOOR

PROFESSIONAL OVERVIEW

Highly skilled Marine Mechanical associate engineer with hands-on experience in maintenance, repair, and troubleshooting of marine engines, mechanical systems, and onboard equipment. Strong knowledge of diesel engines, hydraulic systems, fuel systems, pumps, generators, and preventive maintenance procedures. Adept at diagnosing faults, performing overhauls, and ensuring all machinery operates safely and efficiently according to marine industry standards. Known for strong technical skills, attention to detail, and the ability to work effectively under pressure in shipyards, workshops, and onboard vessels. Committed to safety, quality workmanship, and timely completion of mechanical tasks to support smooth vessel operations.

WORK EXPERIENCE

Marine Mechanical Associate Engineer
PNS NASR (Oil Tanker) — Pakistan
2 Years Sea Service

- Performed preventive and corrective maintenance on marine engines, auxiliary machinery, and onboard mechanical systems during sea operations.
- Assisted in troubleshooting and repairing diesel engines, fuel systems, hydraulic lines, pumps, compressors, and generators.
- Conducted routine inspections to ensure vessel machinery operated safely and efficiently during voyages and training missions.
- Supported senior engineers in machinery overhauls, component replacements, and emergency mechanical repairs at sea.
- Monitored engine performance, recorded technical readings, and reported abnormalities for timely maintenance planning.
- Ensured compliance with marine safety standards, maintenance protocols, and operational procedures while sailing.
- Worked effectively under high-pressure conditions and contributed to smooth vessel operations throughout sea missions.

Courses & Training

- Boot Camp Training
- ELC Training
- WET
- NBCD
- Security Motivational Course
- Fire Fighting & First Aid course
- Sea survival

Education

- ❖ F.Sc (Intermediate) Pre-Engineering
- ❖ Diploma of Associate Engineering (DAEM)
