## Automotive Mechatronics Technician

Email address	oussamamajouri4@gmail.com
Phone number	+216 20554729
Address	Al-Amal District, 2139 Metlaoui
Date of birth	November 6, 2001
Place of birth	Metlaoui
Nationality	Tunisian
Civil status	Single

## Profile

Experienced Auto Mechanic and Electrician with a comprehensive background in vehicle diagnostics, repair, and maintenance. Skilled in utilizing advanced diagnostic tools and managing a wide range of mechanical and electrical systems to ensure optimal vehicle performance and safety.

## Education

### Automotive Mechanics and Electrical Systems

#### Vocational Training Center of Al-Aqila, Gafsa, Metlaoui

I practice this profession with passion and dedication in Tunisia, where I have gained 3 years of hands-on experience. My key strength lies in my dual qualification: I hold diplomas in both **Automotive Mechanics** and **Automotive Electronics**. This combination allows me to work confidently on traditional mechanical components as well as modern electronic diagnostic systems.

#### Why am I the ideal candidate for your company?

- **360-Degree Expertise:** I am capable of managing the entire repair process, from computerized diagnostics to final vehicle delivery.
- **Reliability and Precision:** I have learned that in this trade, customer safety depends entirely on the precision of my work.

## Employment

### Automotive Technician

#### Automotive Workshop, Metlaoui

#### Mechatronics Technician (Mechanic & Electrician)

- **Computerized Diagnostics:** Identifying faults using multi-brand diagnostic tools (OBDII).
- **Engine Repair:** Performing routine and complex maintenance and repairs on

both Diesel and Petrol engines.

- **Light & Heavy Mechanics:** Working on braking systems, suspension, and transmission systems.
- **Electrical Systems:** Repairing alternators, starter motors, and complex wiring harnesses.
- **Routine Maintenance:** Full management of vehicle servicing (oil and filter changes) and air conditioning system recharging.
- **Problem Solving:** Strong ability to resolve critical technical issues and manage mechanical emergencies.
